

## Community Information: See How Your Responses Compare

Through PATH for PWS, participants can keep all of their medical information in one place for easy future reference and see how their answers, behaviors and experiences compare to other respondents in the Prader-Willi syndrome (PWS) community.

Examples of these responses and comparisons are below and depict existing information about PWS community through survey responses in the Global PWS Registry. Please note, these represent the responses at a single point in time and may change as more responses are entered.

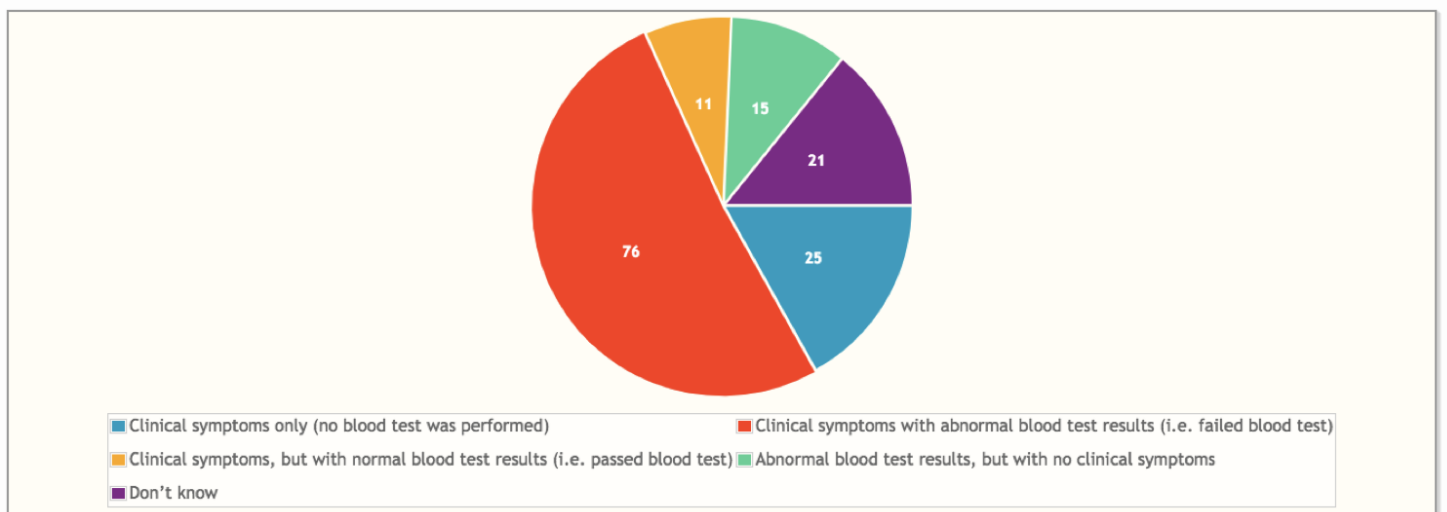

### Example 1: Anxiety

Anxiety of the person with PWS (includes repetitive questioning, obsessive compulsive behavior) (Responses: 178)

### Example 2: Growth hormone deficiency diagnosis

How was the GH deficiency diagnosis made? (Responses: 148)

### Example 3: Frequency of bargaining or manipulation to get more food at mealtimes

During the past 2 weeks, how often did the person try to bargain or manipulate to get more food at meals? (Responses: 287)

Enroll in PATH for PWS today and complete the questionnaires to see how your responses compare to these and other survey topics in the PATH for PWS study and the Global PWS Registry.
